Table 1: Threatened bird species in the Bot-Kleinmond Estuarine System

Common name	Scientific Name	Globally	Nationally
		Threatened	Threatened
Bank Cormorant	Phalacrocorax neglectus	Endangered	Vulnerable
African Marsh Harrier	Circus ranivorus	Least concern	Vulnerable
Blue Crane	Anthropoides paradiseus	Vulnerable	Vulnerable
Great White Pelican	Pelecanus onocrotalus	Least concern	Near Threatened
Cape Cormorant	Phalacrocorax capensis	Near Threatened	Near Threatened
Crown Cormorant	Phalacrocorax coronatus	Near Threatened	Near Threatened
Greater Flamingo	Phoenicopterus ruber	Least concern	Near Threatened
Black Harrier	Circus maurus	Vulnerable	Near Threatened
African Black Oystercatcher	Haematopus moquini	Near Threatened	Near Threatened
Chestnut-banded Plover	Charadrius pallidus	Near Threatened	Near Threatened
Caspian Tern	Sterna caspia	Least concern	Near Threatened
Half-collared Kingfisher	Alcedo semitorquata	Least concern	Near Threatened

Table 2: Species of waterbird at the Bot-Kleinmond Estuarine System meeting Ramsar's global 1% threshold level.

Species common name	Scientific name	Max. count	Ramsar 1% ¹
Caspian Tern	Sterna caspia	88	5.9% (13)
Greater Flamingo	Phoenicopterus ruber	2884	3.8% (7)
Great Crested Grebe	Podiceps cristatus	356	3.7% (22)
Swift Tern	Sterna bergii	704	3.5% (6)
Hartlaub's Gull	Larus hartlaubii	728	2.4% (12)
White-breasted Cormorant	Phalacrocorax carbo	247	2.1% (15)
Cape Shoveler	Anas smithii	720	2.1% (5)
Yellow-billed Duck	Anas undulata	2030	2.0% (3)
Red-knobbed Coot	Fulica cristata	15352	1.5% (3)
Black-necked Grebe	Podiceps nigricollis	199	1.3% (2)
Kelp Gull	Larus dominicanus	867	1.2% (1)
Sandwich Tern	Sterna sandvicensis	2059	1.2% (1)
Great White Pelican	Pelecanus onocrotalus	222	1.1% (1)

(Harebottle 2012)

¹ Figures represent the percentage of the estimated global or Southern African population based on the maximum count from 55 surveys carried out between February 2002 and February 2010. Numbers in parentheses represent the number of counts which met or surpassed the 1% threshold level. Calculated from Wetlands International (2006).

Rare and noteworthy plant species.

Scientific name	National Red List Category
Xiphotheca reflexa	Endangered
Acrodon subulatus	Endangered
Otholobium pungens	Endangered
Cyrtanthus leucanthus	Endangered
Muraltia bolusii	Endangered
Lachenalia lactosa	Endangered
Lachnaea densiflora	Near Threatened
Phylica plumosa	Endangered
Leucospermum prostratum	Vulnerable
Leucadendron linifolium	Vulnerable
Babiana purpurea	Endangered
Geiisshoriza tenella	Vulnerable
Agathosma hookeri	Rare
Moreaea tricolor	Endangered
Lamprantchus bicolor	Vulnerable
lxia putens	Endangered
Moraea versicolor	Vulnerable
